

# National Week of Health & Safety Activity

A joint National Week of Health & Safety Activity will be taking place in the third week of October.

**Monday 17 - Sunday 23 October**

Network Rail and the trade unions are encouraging all recognised safety representatives and responsible managers, in all roles, shifts and functions to plan some joint safety activity, for some point during this week.

We are encouraging a collaborative approach, so safety representatives and managers should; plan a joint inspection or hold a joint safety conversation with their teams - any joint safety initiative that best fits their workplace and environment.

Health & Safety in our workplaces should never be considered a one off annual event; however, we are keen to support this event to help increase the visibility and activity of health and safety, with an emphasis on the importance of a collaborative approach – there is no conflict of interest, we all want the same thing – Everyone Home Safe Every day.
