

## IMDM OUTER

**Access Gate ETF 74M 0000 YRDs Eastleigh South Junction**  
**OUT OF USE UNTIL FURTHER NOTICE**  
**Risk: Land Contamination with potential asbestos**

### Incident

On the 15<sup>th</sup> of May at 14:40 2 members of Eastleigh P/Way staff were departing a work site through Eastleigh Works after working on the **ETF** when they were approached and informed that the land that they had just driven over was contaminated with asbestos.

This incident is currently under investigation.

We are currently working hard to establish:

- If and what contamination is present
- What the risks are to others working in and around the area of land
- What control measures have been put in place.
- Why the area used to gain access to the track was not fenced off and clearly sign posted

### ***ACCESS TO EASTLEIGH WORKS***

Please ensure anyone entering Eastleigh Works signs in at gate 2 gatehouse where important information may be available.

With immediate effect the track access gate on the ETF at:  
**74M 0000Yrds, Eastleigh South Junction**  
**on the UP Side** is closed until further notice
