

NR Wessex Apps

The NR Wessex App is found on the Apple App store, not on a NR specific App.

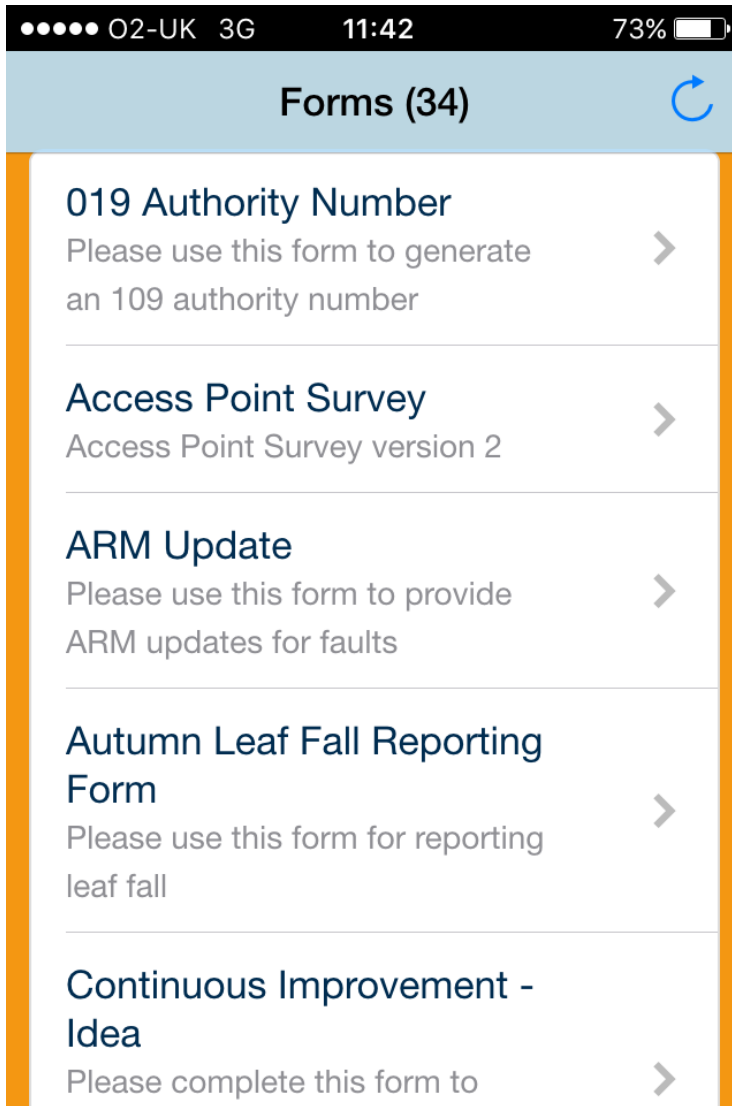

Once downloaded, it will appear on your home screen and you can add apps contained within directly on to your I-device.

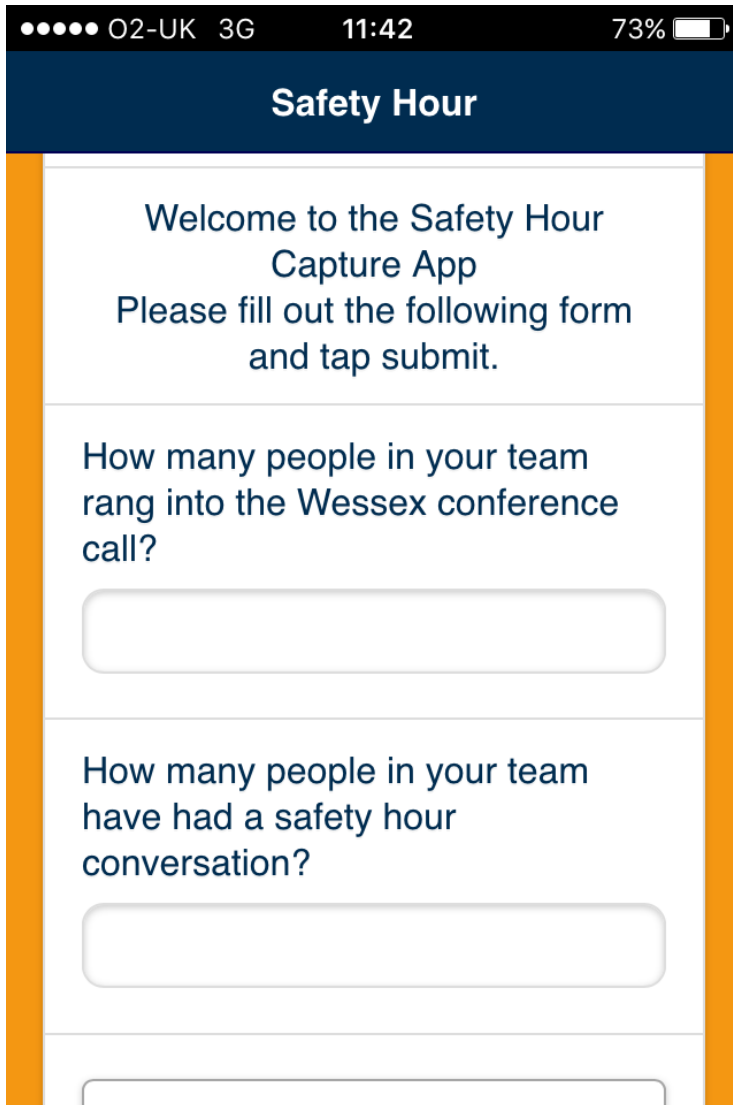

Apps available include;

- Pocket Guides - providing a reference to some common tasks.
- Great British Public Toilets - providing information on the nearest public toilet.
- Forms – more on that in the next slide.
- Safety Hour capture – does what it says on the tin.
- Petrol Prices – the nearest petrol stations and the best prices available.
- Railway Dictionary – containing frequently used words and acronyms.

The Forms App, this includes;

- The 019 authority number generator
- Access Point survey forms
- ARM updates
- Autumn leaf fall
- Continuous Improvement ideas/improvements
- Vehicle inspections
- Comms fault II loggers
- Incident Management forms
- Management safety tours
- PGSI's (both the standard and SSoWP's and on-site forms are available)
- Plant pre-use checks
- POS rep checklists
- Rail temperature records
- Multiple scoping documents
- Tefs
- Worksafe procedure
- All these options are available at the swipe of a finger!

The screenshot shows a mobile app interface for 'Safety Hour'. At the top, the status bar displays 'O2-UK 3G', the time '11:42', and battery level '73%'. The app has a dark blue header with the title 'Safety Hour'. Below the header, the main content area is white with orange sidebars. The text reads: 'Welcome to the Safety Hour Capture App. Please fill out the following form and tap submit.' There are two questions, each followed by a text input field: 'How many people in your team rang into the Wessex conference call?' and 'How many people in your team have had a safety hour conversation?'. A third input field is partially visible at the bottom.

It is important that we take time out of our week to talk about safety. This can be done in an existing team meeting or a dedicated conversation.

It is also important that these conversations are recorded, so that we can see who has or hasn't discussed safety in some way that week.

If you have a safety conversation, please record it!
